CSS - Interligação Externa

- ✓ Ao criar um documento HTML, deve-se criar um link para acesso ao arquivo CSS, salvando-os na pasta do projeto.
- ✓ No exemplo, o arquivo index.html faz referência ao arquivo estilo.css.

Documento HTML

Documento CSS

```
Prof. Marcel Rios
```

```
body {
   text-align: center;
h1 {
   color: darkblue;
```

              </body>
```

Exibição da Página HTML

E se eu precisar colocar uma notícia ao lado da outra?

Prof. Marcel Rios

✓ É possível que você tenha pensado em <u>utilizar uma</u> tabela sem bordas para **organizar o layout**.

S Página Web com CSS

Lorem Ipsum.

Notícia 2

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

✓ Ou ainda imaginar, por exemplo, uma tabela que tenha uma linha inicial para cabeçalho, outra para notícias e outra para o rodapé.

Prof. Marcel Rios

✓ Vamos abordar o modelo de camadas ou modelo de caixas (box model).

Cabeçalho

Prof. Marcel Rios

Conteúdo

Rodapé

- ✓ Uma caixa funciona como um container, ou seja, permite que existam, dentro de si, outras caixas (caixas descendentes).
- ✓ Por meio da <u>estruturação de blocos lógicos</u>, é possível **organizar a apresentação** de <u>diferentes</u> <u>elementos ao longo do documento HTML</u>.

Anatomia da Caixa

✓ Perceba a existência de diferentes propriedades que regulam o comportamento visual de uma caixa:

Sequência - Propriedades de Contorno

✓ As propriedades citadas anteriormente podem ser dimensionadas de duas maneiras semelhantes:

margin-top: 0px;
margin-right: 20px;
margin-bottom: 30px;

margin-left: 10px

Sentido Horário

margin: 0px 20px 30px 10px;

Prof. Marcel Rios

✓ Definindo um valor para todos os lados:

```
padding-top: 20px;
          padding-right: 20px;
          padding-bottom: 20px;
          padding-left: 20px
Prof. Marcel Rios
          padding: 20px;
```

✓ Definindo um valor para margem <u>horizontal</u> e <u>vertical</u>:

```
margin-top: 0px;
           margin-right: 20px;
          margin-bottom: 0px;
           margin-left: 20px
Prof. Marcel Rios
          margin: 0px 20px;
```

✓ Definição da **borda** pode ser feita de duas maneiras:

border-width: 1px ;
border-style: solid;
border-color: #007e7e;

Prof. Marcel Rios

border: 1px solid #007e7e;

- ✓ Objetivo: <u>organizar o conteúdo marcado</u>.
- ✓ <div> é utilizada para dividir áreas ou blocos pressupõe uma quebra antes e depois da área
 dividida.
- ✓ é utilizada de forma in-line (em linha), sem

 y
 quebras de texto.

- ✓ A partir dessas duas TAGs, podemos <u>associar a elas</u> regras CSS, por meio de classes ou identificadores, e alterar as propriedades do modelo de caixa.
- padding: Determina o espaçamento dentro da div.
- border: Determina a existência de uma borda para a div.
- margin: Determina a margem de espaço para fora da div.
- text-align: Determina o alinhamento dentro da div.
- float: Determina para onde a div irá flutuar.

Documento CSS
